

# Self-Registration

Self-registration means that users will be able to register a new account in Flora LMS by themselves without the administrator involved. To do this, they will need only a link to view content or [a sign up link to a group or organization](#).

 You can enable self-registration only when [Privacy Policy and Terms and Conditions](#) text blocks are on.

To allow self-registration:

1. Go to the **Settings** page, choose the **Additional Options** tab, and click **Self-registration**.

2. Once there, select **Enable Self-registration**.

3. Next, configure self-registration settings.

Option	Description
<b>Confirm email address</b>	During the self-registration process, the system may send a confirmation email. Users must follow the link in the email to activate their accounts in Flora LMS.
<b>Enable Domain Limitation for new accounts</b>	This function allows you to restrict access to the LMS from unknown domains. Administrators can specify the allowed domains. Once applied, the self-registration process will only be available to those using email addresses from a specified domain.

Confirm email address

Enable Domain Limitation for new accounts  
Only Users with defined domains will be able to sign up in Self-registration, e.g.: @gmail.com, @yahoo.com

@gmail.com, @aol.com

4. Finally, click **Save**.
