

Flora LMS

Flora LMS is an online platform which is designed to sell courses all over the Internet.

The most prominent feature of this product is the [Marketplace](#) — a powerful storefront which presents your content to potential learners.

Before you start selling courses, you will need to [upload content to the account](#) or create it right in Flora LMS. It's not that complicated as the admin portal is designed so that no programming skills are required to add courses from PC, create [free-form assignments](#) or set up complex [learning paths](#) consisting of multiple chapters and content items.

	Content List
 Dashboard	<p>List of courses in your account</p>
 Marketplace	
 Learning Paths	<input type="checkbox"/> Title ↓
 Content 	<input type="checkbox"/>  Learning Path
 Events	<input type="checkbox"/>  20/80 Time Management
 Reports	<input type="checkbox"/>  Assignment 1
 People	<input type="checkbox"/>  Decision making (PDF)
 Messages	<input type="checkbox"/>  Getting Started with Flora LMS
 Settings	<input type="checkbox"/>  Problem solving (video)
	<input type="checkbox"/>  Sample Course - Space Shuttle

Your students can be either [added manually by yourself](#) or may [sign up](#) on their own. Apart from learners, you can build a team of assistants who will help you in managing users and courses. To do this, you will need nothing but assigning certain users to the [roles](#) of *Administrators*, *Organization Administrators*, and *Publishers*.

Another useful feature available in Flora LMS are [instructors](#) who may be appointed to any course. An instructor is a person who can be asked any course-related questions and will assure a full understanding of the content studied by your learners.

Next, think of structuring your learners. [Groups](#) and [organizations](#) are entities which get together people with similar educational interests or level. This makes it easier for [enrolling learners](#) into courses and tracking their results with [reports](#).

Setting up a Flora LMS account involves not only uploading content and adding users. You may also want to configure its [settings](#) which include branding, security, billing, and many other parameters.

The screenshot shows the FLORA LMS interface. On the left is a navigation sidebar with icons and labels for Dashboard, Marketplace, Learning Paths, Content, Events, Reports, People, Messages, and Settings. The Settings page is active, with a sub-tabbed header containing Main, Branding, E-Commerce, Additional Options (selected), and Billing. Below the header, a text block states: "Here you can activate, deactivate and configure the extra options of your account." Three configuration items are listed: "Self-registration" (checked), "Legal Info" (checked), and "Gamification" (unchecked). Below these items, the "Integrations" section is partially visible.

FLORA		Settings
